

Anderson Yoon

Software Engineer

From serving in restaurants to dreaming in code, I began my programming journey with JavaScript.

Technical Skills

- **Proficient:** JavaScript, Node.js, Express.js, React, Redux, Postgres, Sequelize, Git, HTML, CSS, Heroku, Material-UI
- **Knowledgeable:** AWS, Phaser, Dialogflow, React-Native, Expo, Google Cloud Platform

Projects

- **Kitchen Kevin | Fullstack Developer** | August 2020 - September 2020
Voice recognition application, similar to Amazon Alexa, for recipe searching and reading
 - Developed with React-Native, Expo, and Dialogflow
 - Constructed Dialogflow agent to handle user voice inputs to create an interactive experience with custom voice responses
 - Modified react-native-dialogflow library to handle responsive feedback when a user stops talking**GitHub:**
<https://github.com/2006-capstone-pumpkin-splice-latte/Kitchen-Kevin>
- **Fox-Dodge | Solo-Developer** | August 2020
A fun game-developing learning experience, created a primitive dodging game with unfamiliar technology, within four days.
 - Developed with Phaser 3, Webpack, Express, and Node.js
 - Implemented a simple but interactive parallax background scene with a particle emitter
 - Established basic player animations and game physics**Heroku:** <https://fox-dodge.herokuapp.com/>
- **Scoobyasso | Fullstack Developer** | August 2020
An implementation of an e-commerce website with a typical user shopping experience
 - Developed with Express, React, Redux, Postgres/Sequelize, Passport, Webpack, and Node.js
 - Designed and maintained persistent cart functionality for both guest and user experiences**Heroku:** <https://scoobyasso.herokuapp.com/>
